

Muhammad Zulqarnain Abdullah

github.com/Mzaq1559 | Student ID: 24-CS-19

EDUCATION

Bachelor of Science in Computer Science (BSCS)

University of Engineering and Technology (UET) Taxila

Current: 4th Semester | Student ID: 24-CS-19

RELEVANT COURSEWORK

Database Systems | Numerical Methods | Finance | Computer Architecture | Microcontrollers / AVR Assembly

TECHNICAL SKILLS

Languages:	C++, Python, TypeScript, JavaScript, SQL, AVR Assembly
Frameworks & Libraries:	React 18, Vite, Tailwind CSS, FastAPI, SQLAlchemy, Leaflet, Octokit
Databases:	SQL Server (Docker), SQLite
Infrastructure & Tools:	Docker, Git, GitHub Actions

PROJECTS

My Learning Diary

Personal blog / CMS built with React 18, TypeScript, Vite, and Tailwind CSS.

Uses the GitHub REST API (Octokit) to commit Markdown posts directly to GitHub - no traditional backend required.

RCMS - Rental Car Management System

Full-stack web application. Backend: FastAPI + pyodbc + SQL Server (Docker).

Frontend: Vanilla JavaScript / HTML. Handles rental bookings, fleet inventory, and billing.

AutoSolver - AI Delivery Dispatch Optimization

Built for the Meituan 2026 International AI Hackathon. Optimizes last-mile delivery routes.

Frontend: React + TypeScript + Vite + Tailwind CSS + Leaflet for interactive map visualization.

Backend: FastAPI + SQLite + SQLAlchemy.
